

## Wishaw Health and Social Care Locality Profile Spring 2025

## GEOGRAPHY

There are six health and social care localities across North Lanarkshire. The data in this profile is presented at intermediate datazone geography where possible these 78 geographies have been allocated to the locality areas on a best fit basis. Intermediate Data Zones in Scotland are statistical geographies used to produce local area statistics. They cover larger populations and areas compared to Data Zones, which are smaller units designed to have a population of between 500 and 1,000 people. Intermediate Zones are used when statistics cannot be published at the Data Zone level due to the risk of disclosing sensitive information, however some data is shown at ward level when the data is only available at that level.

The data is drawn from public sources and should be considered alongside local knowledge and with due consideration of the confidence levels around the data.

Upper and lower 95% confidence intervals are shown throughout this document, where appropriate. In charts, these are shown as grey error bars in bar charts. Confidence intervals show the range of possible values and a certainty that the true value falls within them.

## CONTENTS

The graphs and diagrams below show the data for the intermediate geographies within Wishaw locality.

### POPULATION

---

Mid-Year Estimates (2022)

Population Projections (2037)

Where the 65+ population live (2022)

Single Adult Households (2019 - 2023)

### LIFE EXPECTANCY

---

Male and Female Life Expectancy – Scotland and North Lanarkshire Family Group (2022)

Male and Female Life Expectancy – Locality and Intermediate Datazones (2021)

### POVERTY AND DEPRIVATION

---

Income and Employment Deprivation (Based on SIMD 2020)

Percentage of Children (aged under 16) living in relative low-income families (2022/23)

Percentage of population prescribed drugs for anxiety/depression/psychosis (2019 – 2023)

### BENEFITS

---

Recipients of Pension Credit (May 2024)

Recipients of Attendance Allowance (May 2024)

### MOTHER AND BABY INDICATORS

---

Breastfeeding rates (2022)

Percentage of healthy birth weight babies (2022)

Percentage of women smoking during pregnancy (2022)

### IMMUNISATIONS

---

Percentage of 6 in 1 immunisation uptake at 24 months (2022)

Percentage of MMR immunisation uptake at 24 months (2022)

Percentage of HPV Vaccine uptake in S3 girls (2021)

### EARLY DEATHS

---

Deaths aged 15-44 years (2022)

Early Deaths from Cancer aged <75 years (2022)

Early deaths from coronary heart disease aged <75 years (2022)

## HOSPITAL ADMISSIONS

---

Coronary heart disease patient hospitalisations (2021/22 to 2023/24)

Alcohol related hospital admissions (2019-2023)

Emergency patient hospitalisations (2022)

Patients aged 65+ with multiple emergency hospital admissions (2022)

## SCREENING

---

Percentage bowel screening uptake (2021)

## WISHAW HSCP POPULATION 2022

In 2022, the population of North Lanarkshire was 340,920. Data published by the National Records of Scotland projects that in 2037 the population of North Lanarkshire will be 338,195.

The table below outlines the population within Wishaw locality in 2022, with the projected population in 2037 shown in the table on the right.

	Males	Females	Persons
0 - 4	1,149	1,138	2,287
5 - 9	1,308	1,378	2,686
10 - 15	1,881	1,645	3,526
16 - 19	1,122	1,000	2,122
20 - 24	1,455	1,451	2,906
25 - 29	1,496	1,489	2,985

<b>Total population</b>	<b>32,647</b>	<b>33,745</b>	<b>66,393</b>

The 2022 population of Wishaw locality is shown on the pyramid on the left. The projected population for the Wishaw locality in 2037 is shown on the population pyramid on the right. The chart highlights an ageing population; showing the expected increase in the population of older people and changes to the younger population.

## WHERE THE 65+ POPULATION LIVE

The chart below shows the percentage of people over the age of 65 living in localities across North Lanarkshire. There has been no significant change in the population distribution since the last locality profile update, which used data from 2021.

### WHERE THE 65+ POPULATION LIVE – UNIVERSITY HEALTH AND SOCIAL CARE NORTH LANARKSHIRE LOCALITIES 2022

---

## SINGLE ADULT HOUSEHOLDS

Scotland has the highest proportion of one-person households in the UK. Scotland's ageing population is one contributing factor as older people are more likely to live alone or in smaller households. Older people living alone is considered a key indicator of vulnerability.

### SINGLE ADULT HOUSEHOLDS 2019 - 2023

## LIFE EXPECTANCY 2021-2023

The trend for increased life expectancy in Scotland and the UK has stalled in recent years, decreasing for both males and females since 2018-2020. Discussions about this trend are available to read at this [webpage](#)<sup>1</sup>. Life expectancy fell during the COVID 19 pandemic and whilst it has risen slightly, it remains lower than before the pandemic<sup>2</sup>.

Scotland continues to have the lowest life expectancy in the UK and of all Western European countries<sup>2</sup>. Life expectancy in Scotland was 76.8 years for males and 80.85 for females, compared to 78.6 for males and 82.6 for females across the UK. Life expectancy was highest in East Renfrewshire and lowest in Glasgow City for both males and females.

The graphs below show the current life expectancy at birth for North Lanarkshire, alongside other council areas that belong to the same family group in terms of deprivation. South Lanarkshire is included for local benchmarking.

MALE LIFE EXPECTANCY NORTH LANARKSHIRE FAMILY GROUP, 2022

(2021 TO 2023; 3-YEAR AGGREGATES)

# Poverty and deprivation

The following section examines the levels of deprivation in Wishaw using the Scottish Index of Multiple Deprivation (SIMD). SIMD is a tool designed to identify areas in Scotland where people face disadvantages across various aspects of their lives.

The SIMD ranks small geographical areas, known as datazones, in Scotland by several factors - income, employment, health, education, housing, crime and access to services.

Based on these ranks, each datazone is then given an overall deprivation rank which is then used to split datazones into Deprivation Quintiles (Quintile 1 being the most deprived, and Quintile 5 the least). The most recent SIMD ranking was carried out in 2020.

The graphic below illustrates the percentage of Wishaw’s population living in each Quintile, compared to the North Lanarkshire figures.

## INCOME AND EMPLOYMENT DEPRIVATION

The graph below is from the Scottish Index of Multiple Deprivation (SIMD) 2020. It shows the percentage of people who are income and employment deprived within the locality. The number of income deprived people include dependants of someone who is income deprived. This [webpage<sup>2</sup>](#) provides information on the range of income and employment deprivation across North Lanarkshire.

Within the SIMD 2020, other issues highlighted by the data are (1=most deprived; 6976 = least deprived):

- Six Wishaw datazones are in the most acutely deprived 5% nationally:
  - Gowkthrapple - Birkenshaw Brae SIMD rank 53
  - Newmains - Murdostoun View to Isla Avenue SIMD rank 157
  - Wishawhill - Briarwood Road to Wishaw North Junction SIMD rank 212
  - Wishaw - Harestane Road to Houston Street SIMD rank 260
  - Wishawhill - Pentland Road to Cheviot Crescent SIMD rank 273
  - Newmains - Muirhouse Avenue to Dougan Drive SIMD rank 295
- 20 of the 78 datazones in Wishaw are within the 15% most deprived communities in the country.

<sup>2</sup> <https://www.northlanarkshire.gov.uk/your-council/facts-and-figures/scottish-index-multiple-deprivation-simd-2020>

- Within the health domain, 20 datazones are in the 15% most deprived in Scotland. Six datazones are in the 5% most acutely deprived category:
  - Wishawhill – Briarwood Road to Wishaw North Junction SIMD Health Rank 91
  - Gowkthrapple – Birkenshaw Brae SIMD Health Rank 177
  - Newmains – Murdostoun View to Isla Avenue SIMD Health Rank 257
  - Wishaw – Harestane Road to Houston Street SIMD Health Rank 397
  - Wishawhill – Pentland Road to Cheviot Crescent SIMD Health Rank 450
  - Newmains – Muirhouse Avenue to Dougan Drive SIMD Health Rank 733

## RELATIVE LOW INCOME

Relative low income is defined as a family in low income before housing costs (BHC). A family must have claimed one or more of: Universal Credit, Tax Credits or Housing Benefit at any point in the year to be classed as low income in these statistics.

The three wards highlighted in the chart below make up the Wishaw HSCP locality. In North Lanarkshire, 24.7% (14,867) of children aged under 16 live in relative low-income families, compared to the Scottish figure of 21.8% (194,592).

There has been an increase since the last locality profile update, which used 2021 data. North Lanarkshire and Scotland were both 19%. Wishaw was 19.2%, Fortissat 20.7% and Murdostoun 17.4%.

## PERCENTAGE OF CHILDREN (AGED UNDER 16) LIVING IN RELATIVE LOW-INCOME FAMILIES 2022/23

(BEFORE HOUSING COSTS)

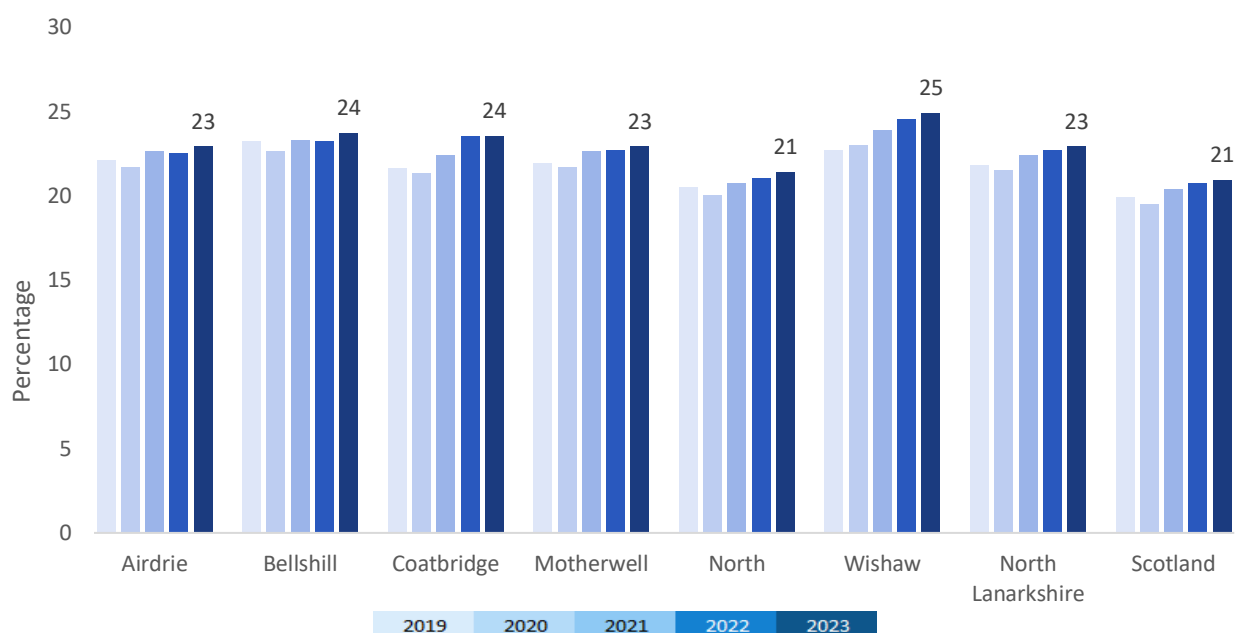

## POPULATION PRESCRIBED DRUGS FOR ANXIETY/DEPRESSION/PSYCHOSIS

The proportion of the population prescribed drugs for anxiety, depression, or psychosis, is one indicator used to calculate the health domain of SIMD. The graph below shows the percentage of people who are prescribed drugs for anxiety/depression/psychosis. There has been no significant change over the five years shown in the chart.

### PERCENTAGE OF POPULATION PRESCRIBED DRUGS FOR ANXIETY/DEPRESSION/PSYCHOSIS UNIVERSITY HEALTH AND SOCIAL CARE NORTH LANARKSHIRE LOCALITIES

2019/20 TO 2023/24 FINANCIAL YEARS

## BENEFITS

### PENSION CREDIT

Pension Credit is a means-tested benefit for people over State Pension age who have a low income. It is made up of two parts – Guarantee Credit and Savings Credit. Pension Credit (Guarantee Credit) tops up any other income to a standard minimum amount.

11% of people over the age of 65 in Scotland receive Pension Credit. In North Lanarkshire the figure is 16%. The number of people claiming Pension Credit has remained stable since the previous locality profile update which used data from May 2022.

#### RECIPIENTS OF PENSION CREDITS AS PERCENTAGE OF 65+ POPULATION UNIVERSITY HEALTH AND SOCIAL CARE NORTH LANARKSHIRE LOCALITIES MAY 2024

#### RECIPIENTS OF PENSION CREDITS AS PERCENTAGE OF 65+ POPULATION – INTERMEDIATE DATAZONES IN WISHAW MAY 2024

ATTENDANCE ALLOWANCE

Attendance allowance is a non-means tested benefit awarded to people aged over 65 who have difficulty in managing some of their day to day activities due to health conditions. It is a proxy for the health of this population group. The number of people claiming attendance allowance is higher in North Lanarkshire (19.4%) than the Scotland average of 13.3%. All of the localities within NL have a rate higher than the Scotland average – Coatbridge is the highest at 22%.

## MOTHER AND BABY INDICATORS

### BREASTFEEDING

Breastfeeding provides the best nutrition for babies and young children and supports children's health in the short and longer term. Breastfeeding also benefits mothers' health. Improving breastfeeding rates helps to improve the health of babies and mothers and reduce inequalities in health.

Breastfeeding varies from 4.2% in Condorrat (North locality), to 38.5% in Balloch East (North locality). This is compared to a council average of 19.7% and a national average of 32.3%. The council average has increased from 17.6% since the last locality profile update, which used data from 2018.

## SMOKING DURING PREGNANCY

Smoking increases the risks of a number of pregnancy-related illnesses and complications. Public Health Scotland data shows that since 2001, smoking prevalence among pregnant women has more than halved, from 25.4% in 2001 to 11% in 2022. In North Lanarkshire, data for 2022 shows that the percentage of women smoking during pregnancy is 12.2%, higher than the Scottish figure of 10.7%. Rates of women smoking during pregnancy vary from 1.4% in Carrickstone (North locality), to 26.8% in Forgewood (Motherwell locality).

### PERCENTAGE OF WOMEN SMOKING DURING PREGNANCY UNIVERSITY HEALTH AND SOCIAL CARE NORTH LANARKSHIRE LOCALITIES 2022

### PERCENTAGE OF WOMEN SMOKING DURING PREGNANCY INTERMEDIATE DATAZONES IN WISHAW 2022

(2021 TO 2023 CALENDAR YEARS; 3-YEAR AGGREGATES)

## IMMUNISATIONS

As a public health measure, immunisations are very effective in protecting individuals from serious infectious diseases and preventing the spread of disease in the wider population. The World Health Organization (WHO) recommends at least 95% of children are immunised against diseases to prevent outbreaks. When babies reach 8 weeks of age they can start the routine immunisation schedule to help protect them through early childhood.

### 6-IN-1 VACCINE

The 6-in-1 vaccine helps protect children against diphtheria, tetanus, whooping cough, polio, Hib, and Hepatitis B. Babies are offered three doses of this vaccine at ages 8, 12, and 16 weeks, although the vaccine can be given up to the age of 10.

#### PERCENTAGE OF 6 IN 1 IMMUNISATION UPTAKE AT 24 MONTHS UNIVERSITY HEALTH AND SOCIAL CARE NORTH LANARKSHIRE LOCALITIES 2022

(2020/21 TO 2022/23 SCHOOL YEARS; 3-YEAR AGGREGATES)

## HPV VACCINE

The HPV immunisation programme began in Scotland on 1 September 2008, vaccinating S2 girls. From 2019, the vaccine was offered to all boys and girls in S1. This indicator reports the uptake of HPV vaccination amongst girls completing the S3 school year. Only this data is available at the level of HSCP locality and intermediate datazone.

(2020/21 TO 2022/23; 3 YEAR ROLLING AVERAGE)

## EARLY DEATHS

The Scottish Government uses a range of indicators, specifically selected to monitor health inequalities over time; Deaths aged 15-44 years, Early Deaths from Cancer (less than 75 years old) and Early Deaths from coronary heart disease (aged <75 years) are indicators of inequalities in morbidity and mortality.

### DEATHS AGED 15-44 YEARS

The trend over the five years shown in the chart is that North Lanarkshire is higher than Scotland for all of those five years. Airdrie is 5% lower than the North Lanarkshire figure for 2022 but 10% higher than the Scottish rate.

DEATHS AGED 15-44 YEARS UNIVERSITY HEALTH AND SOCIAL CARE NORTH LANARKSHIRE LOCALITIES 2018 TO 2022  
(3-YEAR AGGREGATE; AGE-SEX STANDARDISED RATE PER 100,000)

### EARLY DEATHS FROM CANCER

The number of early deaths from cancer has fallen since the last locality profile update, which used 2018-2020 3 year aggregated data. Rates in Scotland have fallen by 7%, with North Lanarkshire seeing a decrease of 12%. Airdrie locality has seen a decrease of 7%, however Wishaw locality saw the biggest decrease of 24%.

## EARLY DEATHS FROM CANCER <75 YEARS UNIVERSITY HEALTH AND SOCIAL CARE NORTH LANARKSHIRE LOCALITIES 2022

(2021 – 2023; 3-YEAR AGGREGATE; AGE-SEX STANDARDISED RATE PER 100,000)

## EARLY DEATHS FROM CORONARY HEART DISEASE

Rates of early deaths from coronary heart disease (CHD) have increased by 8% in Scotland since the previous locality profile update, which used 2019 data based on 2018 to 2020 3-year aggregates. North Lanarkshire has seen an increase of 15% for the same period.

## EARLY DEATHS FROM CORONARY HEART DISEASE (CHD), AGED <75 YEARS, UNIVERSITY HEALTH AND SOCIAL CARE NORTH LANARKSHIRE LOCALITIES 2018 – 2022

(3-YEAR AGGREGATE; AGE-SEX STANDARDISED RATE PER 100,000)

(2021 TO 2023; 3-YEAR AGGREGATES; AGE-SEX STANDARDISED RATE PER 100,000)

## HOSPITAL ADMISSIONS

Hospital admissions can provide some indication of how certain diseases impact on people's lives.

### CORONARY HEART DISEASE (CHD) HOSPITALISATIONS

The previous locality profile update used data from 2019/2020 – 2021/22. The latest data shows that there has been a decrease of 5% in Scotland and North Lanarkshire of patients discharged from hospital with coronary heart disease. In Wishaw locality, there has been a decrease of 8%.

### CORONARY HEART DISEASE (CHD) PATIENT HOSPITALISATIONS UNIVERSITY HEALTH AND SOCIAL CARE NORTH LANARKSHIRE LOCALITIES 2021/22 TO 2023/24 FINANCIAL YEARS

(3-YEAR AGGREGATES; AGE-SEX STANDARDISED RATE PER 100,000)

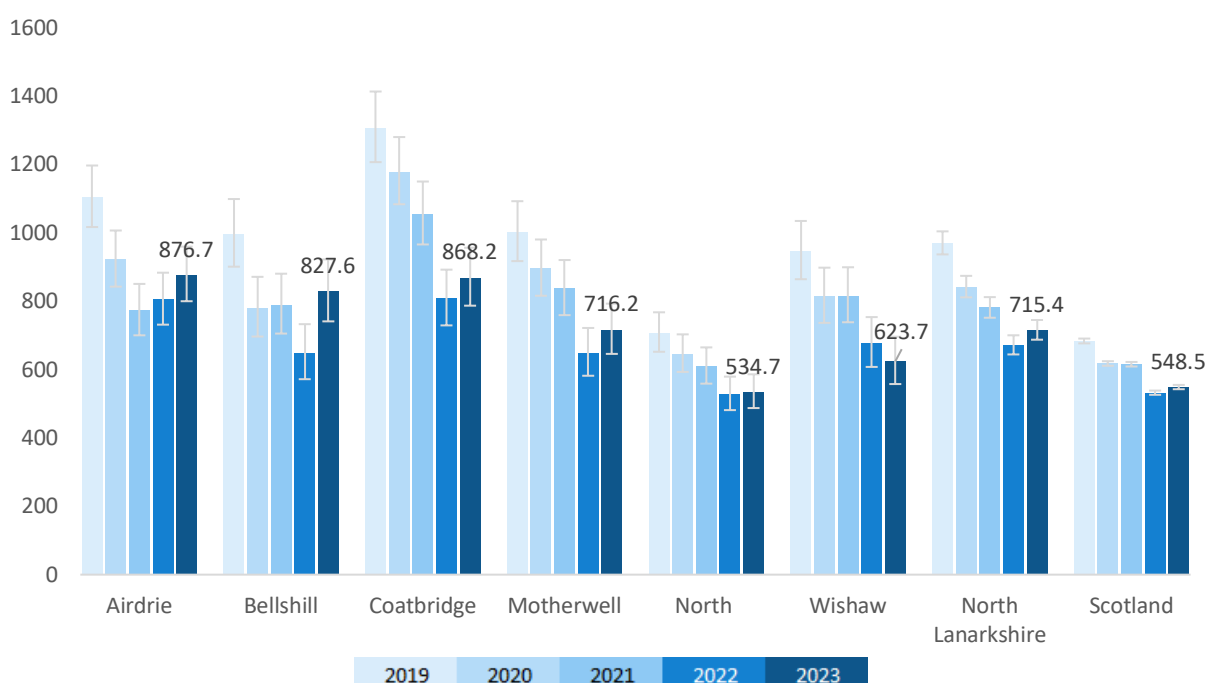

## ALCOHOL RELATED HOSPITAL ADMISSIONS

Excessive consumption of alcohol can result in a wide range of health problems. Some may occur after drinking over a relatively short period, such as acute intoxication (drunkenness) or poisoning (toxic effect). Others develop more gradually, only becoming evident after long-term heavy drinking, such as damage to the liver and brain. In addition to causing physical problems, excessive alcohol consumption can lead to mental health problems such as alcohol dependency. Alcohol can also play a factor in a range of other conditions such as injuries, epilepsy, and cancer. ([Alcohol related hospital statistics - Scotland financial year 2022/23 - Alcohol related hospital statistics - Publications - Public Health Scotland](#))

### ALCOHOL-RELATED HOSPITAL ADMISSIONS UNIVERSITY HEALTH AND SOCIAL CARE NORTH LANARKSHIRE LOCALITIES 2019 - 2023

(3-YEAR AGGREGATE; AGE-SEX STANDARDISED RATE PER 100,000)

The number of alcohol related hospital admissions in North Lanarkshire and Scotland has decreased over the last five years. Since the last locality profile update, which used data from 2019, rates in North Lanarkshire have decreased by 27% with the Scotland figure falling by 19%. One intermediate datazone in Wishaw has not followed this trend and as seen an increase in the number of alcohol related hospital admissions – Coltness (26%). Wishaw East (73%) and Stane (63%) have seen the largest decrease.

## ALCOHOL-RELATED HOSPITAL ADMISSIONS 2023 - INTERMEDIATE DATAZONES IN WISHAW

(2023/24 FINANCIAL YEAR; AGE-SEX STANDARDISED RATE PER 100,000)

## EMERGENCY PATIENT HOSPITALISATIONS

There has been no significant change in the number of emergency patient hospitalisations since the last locality profile update, which used data from 2020.

## EMERGENCY PATIENT HOSPITALISATIONS UNIVERSITY HEALTH AND SOCIAL CARE NORTH LANARKSHIRE LOCALITIES - 2022

(2021 TO 2023; 3-YEAR AGGREGATES; AGE-SEX STANDARDISED RATE PER 100,000)
